

## Tread Style

	Tire	Also Known As	Best Use
	R-1	Tractor pattern	Versatile between road and field, best for average soil conditions
	R-1W	Wet	20% more tread than R-1. Best for wet conditions like manure pits and clay
	R-2	Deep tread, paddle	Designed for extremely wet or sticky soil
	R-3	Floatation, turf	Minimizes disturbance on grass and sand
	R-4	Industrial	Balance traction for use on road and hard-surface
	HF	High flotation	Large air volume, improves flotation for less disturbance
	F-2	Rib tires	Maximize steering ability on 2wd tractors
